

I drive tractor/trailer. Please stop this drive to stop XM from delivering instant weather/traffic. This service is much better than trying to find a local station before getting into the town or going through a town to deliver freight. If not for this service we would not be able to move freight on time for you the consumer. Late freight makes for unhappy consignees and an unhappy consignee can make a drivers day miserablle. We try our best to make on time deliveries and XM instant traffic and weather is one way we do it. We drivers love this new service.
